

WHAT IS CLAIMED IS:

1. An electronic device comprising:
- a first housing;
  - a second housing;
  - 5 a hinge,
- wherein the first and second housings are coupled together by the hinge,
- wherein a first center line of the first housing and a second center line of the second housing are in parallel with each other only in a state where the first
- 10 housing and the second housing are folded via the hinge.
2. A device according to claim 1,
- wherein a first surface of the first housing and a second surface of the second housing oppose each other.
3. A device according to claim 1,
- 15 wherein one of the first and second housing includes a transmitting unit while the other of the first and second housing includes a receiving unit.
4. A device according to claim 1,
- wherein one of the first and second housing includes display unit while the other of the first and second housing includes an operation key.
- 20 5. A device according to claim 1,
- wherein the first and second housing are connected in a direction

selected from the group consisting of a vertical direction and a lateral direction.

6. A device according to claim 4,

wherein a symbol displayed on the display unit is changed according to a direction of the electronic device.

5 7. A device according to claim 4,

wherein the operation key includes at least a translucent button and a display portion formed under the translucent button.

8. A device according to claim 4,

10 wherein the display unit includes one selected from the group consisting of a liquid crystal display device and a light emitting device.

9. A device according to claim 4,

wherein a symbol including at least one selected from the group consisting of a letter, a character, an alphabet, a numeral and a pictograph is displayed on the display unit.

15 10. A device according to claim 4,

wherein a picture is displayed on the display unit.

11. A device according to claim 8,

20 wherein a photoelectric conversion element is formed in the one selected from the group consisting of the liquid crystal display device and the light emitting device.

12. A device according to claim 1,  
wherein the electronic device is an information terminal.

13. A device according to claim 1,  
wherein the electronic device is a cellular phone.

5 14. A device according to claim 1,  
wherein the electronic device is a PDA (personal digital assistant).

10072496-020502  
10 15. An electronic device comprising:  
a first housing;  
a second housing;  
a hinge,  
wherein the first and second housings are coupled together by the  
hinge,  
wherein each of the first and second housings has a pair of lines opposing  
each other,  
15 wherein one of the pair of lines has a shorter length than the other one  
of the pair of lines.

16. A device according to claim 15,  
wherein at least one of the first and second housing includes a display  
unit,  
20 wherein the display unit includes one selected from the group consisting  
of a liquid crystal display device and a light emitting device.

17. A device according to claim 16,

wherein a photoelectric conversion element is formed in the one selected from the group consisting of the liquid crystal display device and the light emitting device.

5 18. A device according to claim 15,

wherein the electronic device is an information terminal.

19. A device according to claim 15,

wherein the electronic device is a cellular phone.

20. A device according to claim 15,

10 wherein the electronic device is a PDA (personal digital assistant).

21. An electronic device comprising:

a first housing;

a second housing;

a hinge,

15 wherein the first and second housings are coupled together by the hinge,

wherein each of the first and second housings has a trapezoid shape.

22. A device according to claim 21,

20 wherein at least one of the first and second housing includes a display unit,

wherein the display unit includes one selected from the group consisting

of a liquid crystal display device and a light emitting device.

23. A device according to claim 22,

wherein a photoelectric conversion element is formed in the one selected from the group consisting of the liquid crystal display device and the light emitting  
5 device.

24. A device according to claim 21,

wherein the electronic device is an information terminal.

25. A device according to claim 21,

wherein the electronic device is a cellular phone.

10 26. A device according to claim 21,

wherein the electronic device is a PDA (personal digital assistant).
